

Lipoprotein (a) Word Search Challenge

Did you know high Lp(a) levels affect about 1 in 5 people worldwide? Lipoprotein (a), or Lp(a), is a genetic risk factor for heart disease. It's not included in regular cholesterol tests or lipid panels. While diet and exercise don't lower Lp(a) levels, they do improve overall heart health. If someone in your family has high Lp(a), close relatives should get tested too!

Welcome to the Lp(a) Word Search Challenge! Find and circle the hidden words related to Lipoprotein(a). **Words can be vertical, horizontal or diagonal.**

- 1. Lipoprotein
- 2. Cholesterol
- 3. Genetic
- 4. Testing
- 5. Heart
- 6. Risk
- 7. Family
- 8. Plaque
- 9. Doctor
- 10. Inherited
